

# CENTRAL WATER & SEWERAGE AUTHORITY

## Seasonal Water Management Alert System

STAGE	CODE	STATUS	INTERPRETATION
1	GREEN	Normal	Water Catchment is stable. No notable threats to supply detected. Normal conservational use of water allowed.
2	YELLOW	Advisory	Potential risk to supply detected. Consumers on the flagged catchment should begin preparations to be able to store water if alert level increases.
3	ORANGE	Watch	Definite risk to supply detected. Consumers should activate water storage measures immediately. Non-essential uses of water should be decreased.
4	RED	Warning	System is currently under risk, and strict water conservation measures will now be put into place. Car washes, power washing and all other non-essential uses of water should cease completely.
